KEY BUSINESS INSIGHTS:

- Technology is the most profitable category; Furniture drags overall margin down.
- West and East regions generate over two-thirds of total company profit.
- Consumer segment drives 50% of revenue and the largest share of profit.
- Tables and Bookcases are structurally unprofitable despite steady sales.
- Higher discounts are linked to lower profit across the business.

BUSINESS RISKS:

- Texas posts a loss despite strong sales: A regional pricing/discounting problem.
- Deep discounting is quietly eroding margin even as headline sales look healthy.
- Over 85% of profit comes from just two categories: Technology and Office Supplies.

BUSINESS OPPORTUNITIES:

- Copiers has the highest profit margin (37%) but is under-scaled room to grow.
- The West region's can likely be replicated in the underperforming Central region.
- Fixing pricing on Tables and Bookcases alone could recover over \$21K in lost profit.

BUSINESS RECOMMENDATIONS:

1. Cap discounting on Tables, Bookcases, and other loss-making sub-categories

Supported by: The matrix shows Tables lost \$17.7K and Bookcases lost \$3.5K despite meaningful sales volume, and the discount-vs-profit correlation (≈ -0.22) confirms deeper discounts are linked to lower profit.

2. Investigate and correct pricing/cost issues in the Central region and Texas

Supported by: The region visual shows Central trailing at only \$39.7K profit on \$501K sales, while the state chart shows Texas posting a net loss despite strong sales, both far below the West/East benchmark.

3. Reallocate marketing and inventory investment toward Technology and Copiers

Supported by: The category chart shows Technology as the most profitable category (\$145.5K profit), and Copiers stands out in the sub-category view with a 37% profit margin, the highest of any product line.

4. Introduce a discount approval threshold or governance policy

Supported by: The negative correlation between discount depth and profit across the dataset shows current discounting practices are eroding margin rather than driving profitable volume.

5. Design retention and loyalty offers targeted at the Consumer segment

Supported by: The segment chart shows Consumer generating 50% of total sales and the largest share of profit (\$134.1K), it's the single biggest driver of the business, so retaining it protects the most value.
